

Reporty AI Instructions Tools Catalog — Agent B (In-App Full-Platform Maha)

This catalog replaces the previous Agent B (AI-Instructions only) catalog. The in-app Maha now spans all 12 dashboard sections — MyFacility, Treatment Lists, WhatsApp Connect, MySchedule, MyDoctors, Marketing, My Report, Dr. Norah, Dr. Aziz, Profile, My Wallet, MyAnalytics — with read/write/navigation tools and clear walk-through boundaries for actions the agent must NOT execute.

Major change in this revision: Dr. Norah and Dr. Aziz reporting flows are now READ-ONLY for the agent. The agent reads past + in-progress reports, looks up ICD10 codes for guidance, and walks the owner through verbally — but never starts, fills, drafts, summarizes, edits, or submits any report. Every click in the reporting flow is the owner's manual UI action.

Legend

NEW	UPDATED	EXISTING	OWNER-ONLY	NEVER
-----	---------	----------	------------	-------

- NEW — Added in this iteration
- UPDATED — Existed but modified
- EXISTING — Pre-existing, no change
- OWNER-ONLY — Walk-through only, agent never executes
- NEVER — Forbidden absolutely

1. Read tools — always safe, called first

Read once per session and re-read before any write that depends on current state.

READ TOOLS

Stale snapshots are forbidden by hard rule 4.

Tool / Function	Signature	Purpose / Notes	Status
read_facility_state	read_facility_state()	Full MyFacility state. Source of truth for sections 1-3.	NEW
read_schedule_settings	read_schedule_settings()	automatic_booking, automatic_double_booking, no_show_threshold, grace_period_minutes.	NEW
read_appointments	read_appointments(date_range, doctor_id?, specialty?)	Calendar query.	NEW
read_doctors	read_doctors()	Doctor roster.	NEW
read_doctor_schedule	read_doctor_schedule(doctor_id)	Per-doctor schedule.	NEW
read_treatment_list	read_treatment_list(doctor_id, search?, page?)	Paginated treatment list.	NEW
read_retargeting_settings	read_retargeting_settings()	Retargeting state.	NEW
read_retargeting_log	read_retargeting_log(page?)	Read-only message log.	NEW
read_report_branding	read_report_branding()	My Report state.	NEW
read_account_profile	read_account_profile()	Name, phone. Never returns password.	NEW
read_subscription	read_subscription()	Plan, transactions. Read-only.	NEW
read_analytics	read_analytics()	MyAnalytics. May 500 — graceful degradation.	NEW
read_whatsapp_connection_statuses	read_whatsapp_connection_status()	Connection status.	NEW
list_instructions	list_instructions()	Current AI Instructions list — source of truth for dedupe.	NEW

read_dental_reports	<code>read_dental_reports(filter?)</code>	List Dr. Norah reports by status / date / patient. Read-only.	NEW
read_medical_reports	<code>read_medical_reports(filter?)</code>	List Dr. Aziz reports by status / date / patient. Read-only.	NEW
read_report_detail	<code>read_report_detail(report_id)</code>	Full read of one dental OR medical report — dental chart, diagnoses, complaints, treatments, sessions, summaries, submission status.	NEW
get_dental_chart_state	<code>get_dental_chart_state(report_id?)</code>	Snapshot of tooth selection for an in-progress Dr. Norah report. Read-only.	NEW
icd10_search	<code>icd10_search(query)</code>	Live ICD10 lookup. Used by the agent ONLY for guidance (to share suggested codes with the owner). The agent does NOT write codes into reports — the owner does that in the UI.	NEW
show_report_preview	<code>show_report_preview()</code>	Preview the patient-facing report branding. Safe — no write.	NEW
show_schedule_preview	<code>show_schedule_preview(doctor_id?, week?)</code>	Preview the calendar. Safe — no write.	NEW

2. Write tools — MyFacility

Clinic identity + schedule + insurance + AI Instructions + pricing + promotions.

MyFacility — Step 1 (Social Media)

8 URL fields plus a platform AI search.

Tool / Function	Signature	Purpose / Notes	Status
update_social_media_link	update_social_media_link(platform, url)	platform: website instagram maps whatsapp facebook x snapchat tiktok.	NEW
trigger_get_information_ai	trigger_get_information_ai(clinic_name)	Platform AI fetches social handles. Suggestions only — nothing auto-applied.	NEW

MyFacility — Step 2 (Clinic Information)

Clinic identity + schedule blocks + insurance + agent language/country + AI Instructions.

Tool / Function	Signature	Purpose / Notes	Status
update_facility_info	update_facility_info(field, value)	clinic_name, address, agent_language, agent_country.	NEW
add_schedule_block	add_schedule_block(day, open_time, close_time)	Supports split shifts.	NEW
update_schedule_block	update_schedule_block(block_id, ...)	Modify a block.	NEW
remove_schedule_block	remove_schedule_block(block_id)	TIER 2.	NEW
update_insurance_list	update_insurance_list(insurance[])	Replace the list.	NEW
save_instruction	save_instruction(instruction_text, position?)	NEW behavioral rule. DEDUPE CHECK precedes.	NEW
update_instruction	update_instruction(instruction_id, new_text)	Preferred over save when there's overlap.	NEW

<code>remove_instruction</code>	<code>remove_instruction(instruction_id)</code>	TIER 2.	NEW
<code>reset_all_instructions</code>	<code>reset_all_instructions()</code>	TIER 3 + one-shot revert.	NEW

MyFacility — Step 3 (Pricing & Promotions)

Per-doctor pricing files + promotions table.

Tool / Function	Signature	Purpose / Notes	Status
<code>add_promotion</code>	<code>add_promotion(name, description, start_date, end_date)</code>	Warn if end_date is past.	NEW
<code>update_promotion</code>	<code>update_promotion(promotion_id, ...)</code>	TIER 1.	NEW
<code>remove_promotion</code>	<code>remove_promotion(promotion_id)</code>	TIER 2.	NEW
<code>(per-doctor pricing file upload)</code>	—	Binary ≤10MB. Walk through.	OWNER-ONLY

3. Write tools — Treatment Lists

Dr. Norah's (≈610) + Dr. Aziz's (≈10,093)

Search before adding. Currency change does not auto-convert.

Tool / Function	Signature	Purpose / Notes	Status
<code>add_treatment</code>	<code>add_treatment(doctor_id, sbc_code, name, price)</code>	Always search first.	NEW
<code>update_treatment</code>	<code>update_treatment(treatment_id, sbc_code?, name?, price?)</code>	TIER 1.	NEW
<code>remove_treatment</code>	<code>remove_treatment(treatment_id)</code>	TIER 2.	NEW
<code>save_treatment_list_changes</code>	<code>save_treatment_list_changes(doctor_id)</code>	Explicit save required.	NEW
<code>change_treatment_list_currency</code>	<code>change_treatment_list_currency(doctor_id, currency)</code>	Prices stay numerically same — warn.	NEW
<code>toggle_use_for_all_doctors</code>	<code>toggle_use_for_all_doctors(doctor_id, enabled)</code>	TIER 3 + STRONG warning.	NEW

4. Write tools — WhatsApp Connect

WhatsApp connection

QR scan is owner-only. Business API needs Reporty-team activation.

Tool / Function	Signature	Purpose / Notes	Status
(WhatsApp QR scan)	—	3-step QR flow. Walk through.	OWNER-ONLY
<code>request_whatsapp_business_api_activation</code>	<code>request_whatsapp_business_api_activation(notes?)</code>	Sends activation request	NEW

to
Reporty
team.

5. Write tools — MySchedule

Calendar + booking + per-doctor + appointment add

Automatic Booking OFF is TIER 3.

Tool / Function	Signature	Purpose / Notes	Status
update_schedule_settings	<code>update_schedule_settings(automatic_booking?, automatic_double_booking?, no_show_threshold?, grace_period_minutes?)</code>	automatic_booking OFF = TIER 3. double_booking ON = TIER 2.	NEW
setup_doctor_schedule	<code>setup_doctor_schedule(doctor_id, follow_clinic_general?, visit_duration?, doctor_availability?, ...)</code>	Per-doctor. Custom procedures upload is owner-only.	NEW
add_appointment	<code>add_appointment(patient_name, phone, doctor_id, date, time_from, time_to)</code>	Manually book.	NEW
cancel_appointment	<code>cancel_appointment(appointment_id, reason?)</code>	TIER 2.	NEW
reschedule_appointment	<code>reschedule_appointment(appointment_id, new_date, new_time_from, new_time_to)</code>	Move.	NEW
approve_pending_appointment	<code>approve_pending_appointment(appointment_id)</code>	Explicit owner instruction required.	NEW
reject_pending_appointment	<code>reject_pending_appointment(appointment_id, reason?)</code>	Explicit owner instruction required.	NEW

6. Write tools — MyDoctors

Doctor roster

Subscribe / Remove have safety rails.

Tool / Function	Signature	Purpose / Notes	Status
update_doctor	<code>update_doctor(doctor_id, first_name?, last_name?, email?, phone?, role[]?, send_summary?, whatsapp_number?)</code>	TIER 1-2 depending on field.	NEW

remove_doctor	remove_doctor(doctor_id)	TIER 3 + warn about historical reports.	NEW
(Subscribe New Doctor – Checkout)	–	Paid action. Walk through.	OWNER-ONLY

7. Write tools — Marketing

Retargeting + Bulk Campaigns (requires WhatsApp Business)

Stopping retargeting is TIER 3.

Tool / Function	Signature	Purpose / Notes	Status
<code>update_retargeting_settings</code>	<code>update_retargeting_settings(intervals[4]?, use_discount?, discount_percent?)</code>	Update intervals + discount.	NEW
<code>toggle_retargeting</code>	<code>toggle_retargeting(status)</code>	status: 'on' 'stop'. 'stop' = TIER 3 STRONG warning.	NEW
<code>generate_campaign_content</code>	<code>generate_campaign_content(language, dialect?, campaign_idea)</code>	Platform AI generates a WhatsApp-ready message.	NEW
<code>refine_campaign_content</code>	<code>refine_campaign_content(content, refinement)</code>	refinement: 'more_engaging' 'shorter' 'simpler'.	NEW
(Send bulk campaign)	—	Mass blast — owner clicks Send.	OWNER-ONLY
(Dental Radiograph campaign upload)	—	Binary upload ≤10MB.	OWNER-ONLY

8. Write tools — My Report

Patient-report branding

Logo, voice note, theme, contact/social display toggles.

Tool / Function	Signature	Purpose / Notes	Status
<code>update_report_branding</code>	<code>update_report_branding(field, value)</code>	Single-field update.	NEW
<code>apply_report_theme</code>	<code>apply_report_theme(preset_or_custom)</code>	'Blue' 'Orange' 'Green' or custom colors.	NEW
<code>save_report_page</code>	<code>save_report_page()</code>	Global save — required.	NEW

(Report photo upload)	—	JPG/JPEG/PNG ≤2MB.	OWNER-ONLY
(Voice note record/upload)	—	30-45s. Owner only.	OWNER-ONLY

9. READ-ONLY — Dr. Norah (Reporty Dent)

Dr. Norah dental reports — ENTIRE flow is OWNER-ONLY

The agent reads existing / in-progress reports, looks up codes for guidance, opens the section, walks the owner through verbally. NEVER starts a report, NEVER fills any of the 5 steps, NEVER drafts / generates / edits any summary, NEVER submits. Every click is the owner's.

Tool / Function	Signature	Purpose / Notes	Status
<code>read_dental_reports</code>	<code>read_dental_reports(filter?)</code>	List dental reports by status / date / patient. Read-only.	NEW
<code>read_report_detail</code>	<code>read_report_detail(report_id)</code>	Full read of one report — chart, diagnoses, complaints, treatments, sessions, 'I Did' summary, submission status.	NEW
<code>get_dental_chart_state</code>	<code>get_dental_chart_state(report_id?)</code>	Tooth selection snapshot. Read-only.	NEW
(Start new Dr. Norah report)	—	Owner clicks Start Reporting in UI.	OWNER-ONLY
(Fill dental chart / diagnosis / complaint / treatment / sessions)	—	Each step's UI action is the owner's.	OWNER-ONLY
(Generate / edit 'I Did' summary)	—	Owner clicks Generate, owner edits text.	OWNER-ONLY
(Submit dental report)	—	Irreversible — patient receives the report. Owner-only.	OWNER-ONLY

10. READ-ONLY — Dr. Aziz (Reporty Med)

Dr. Aziz medical reports — ENTIRE flow is OWNER-ONLY

Same posture as Dr. Norah: read-only for the agent, owner clicks every step in the UI. The agent uses `icd10_search` for guidance only — never writes codes into a report.

Tool / Function	Signature	Purpose / Notes	Status
<code>read_medical_reports</code>	<code>read_medical_reports(filter?)</code>	List medical reports. Read-	NEW

<code>read_report_detail</code>	<code>read_report_detail(report_id)</code>	only. Full read of one report — diagnoses (ICD10 + free text), complaints, treatments, sessions, 'I Did' summary, 'I Prescribed' summary, submission status.	NEW
<code>icd10_search</code>	<code>icd10_search(query)</code>	Live ICD10 lookup. Agent uses ONLY to suggest codes verbally — never writes them.	NEW
(Start new Dr. Aziz report)	—	Owner clicks Start Reporting in UI.	OWNER-ONLY
(Set diagnosis / complaint / treatment / sessions)	—	Each step's UI action is the owner's. Diagnosis can be ICD10 OR free text.	OWNER-ONLY
(Generate / edit 'I Did' and 'I Prescribed' summaries)	—	Owner triggers both AI generations and edits the text.	OWNER-ONLY
(Submit medical report)	—	Irreversible. Two-step UI confirmation. Owner-only.	OWNER-ONLY

11. Write tools — Profile

Account information

Email read-only. Password NEVER touched.

Tool / Function	Signature	Purpose / Notes	Status
<code>update_account_info</code>	<code>update_account_info(first_name?, last_name?, phone?)</code>	Edit name and phone.	NEW
(Profile photo upload)	—	JPG/JPEG/PNG ≤5MB. Owner only.	OWNER-ONLY
(Password fields)	—	NEVER touched.	NEVER

12. Read-only — My Wallet

Subscription + transactions

All wallet actions are owner-only.

Tool / Function	Signature	Purpose / Notes	Status
<code>read_subscription</code>	<code>read_subscription()</code>	Plan, price, next_bill, transactions. Read-only.	NEW
(Unsubscribe)	—	Owner-only.	NEVER
(Subscribe New Doctor – Checkout)	—	Owner-only.	NEVER

13. Navigation / utility tools

Navigation, templates, previews

Help the owner move around.

Tool / Function	Signature	Purpose / Notes	Status
<code>open_dashboard_section</code>	<code>open_dashboard_section(section_id)</code>	Navigate the dashboard.	NEW
<code>render_section_chip</code>	<code>render_section_chip(section_id)</code>	Inline clickable card.	NEW

download_template	<code>download_template(template_id)</code>	Custom procedures, recipient list, etc.	NEW
--------------------------	---	---	------------

14. Reset tools (TIER 3)

Per-section reset + AI Instructions wipe

Always show a preview of what will be deleted before executing.

Tool / Function	Signature	Purpose / Notes	Status
reset_section	<code>reset_section(section_id)</code>	Reset a single section. TIER 3.	NEW
reset_all_instructions	<code>reset_all_instructions()</code>	TIER 3 + one-shot revert.	NEW

15. Support / out-of-scope

Escalation path

For everything outside the 12 sections.

Tool / Function	Signature	Purpose / Notes	Status
open_support_widget	<code>open_support_widget(reason?)</code>	Out-of-scope, tool failures, third-insistence safety conflicts, model-disclosure persistence, billing.	NEW

Summary — what changed

Previous Agent B had 8 tools (AI Instructions only). This version expands to ~60 tools across the 12 dashboard sections, plus explicit walk-through-only entries.

Key capabilities:

- Problem-analysis loop — UNDERSTAND → INVESTIGATE → ANALYZE → PROPOSE → CONFIRM → EXECUTE → VERIFY → OFFER REVERT.
- Session-revert log — every write tracked with before-snapshot for precise 'undo / ارجع' rewinds.
- Four confirmation tiers — TIER 1 routine, TIER 2 significant, TIER 3 destructive (two-step), TIER 4 owner-only (walk-through).
- Owner-only walk-through for irreversible / paid / binary / password / QR / unsubscribe actions.
- Cross-section field routing — direct write to facility, schedule, doctors, marketing, report-branding sections.
- Dr. Norah & Dr. Aziz are READ-ONLY for the agent. Agent reads existing reports, looks up ICD10 codes for guidance, walks the owner through verbally. NEVER starts, fills, drafts, edits, or submits any report.
- Model-disclosure secrecy (GPT-4.1 never revealed).
